WHERE THE JOBS ARE

Between January 1985 and January 1986, thousands of new jobs were created in the various states. The list below shows the number (in thousands) by state.

California	333.0
New York	167.6
Florida	166.1
Ohio	155.8
Texas	135.8
Virginia	122.0
Pennsylvania	106.0
Georgia	105.5
Michigan	100.0
New Jersey	87.0
North Carolina	80.7
Indiana	74.0
Tennessee	73.9
Arizona	73.9
Massachusetts	62.2
Washington	62.1
Missouri	55.9
Maryland	54.7
South Carolina	46.0
Connecticut	38.9
Alabama	35.7
Kentucky	35.5
Arkansas	33.8
Wisconsin	32.0
Minnesota	31.7
New Hampshire	27.3
Oregon	23.6
Mississippi	23.4
Colorado	23.0
Utah	20.2
Nevada	18.2
Maine	16.1
Iowa	14.1
New Mexico	14.0
District of Columbia	13.4
Vermont	12.6
Delaware	11.3
Hawaii	9.9
Kansas	9.9
West Virginia	8.8
Idaho	7.1
Nebraska	5.4
Alaska	4.0
Rhode Island	2.5
Montana	0.7
Wyoming	0.7
South Dakota	-1.1
North Dakota	-1.6
Illinois	-1.7
Oklahoma	-9.6
Louisiana	-10.5

EQUALITY BEFORE THE LAW
MARCH 1ST 1867

NEBRASKA DEPARTMENT OF LABOR
ADMINISTRATIVE SERVICES DIVISION
Robert H. Shanahan • Director of Administration
Wendell O. Olson • Labor Market Information Administrator

Information, The Cutting Edge In Competition

The Nebraska Department of Labor, through the Labor Market Information (LMI) division, in cooperation with the U.S. Bureau of Labor Statistics (BLS) and the Employment and Training Administration, is conducting a voluntary survey of Nebraska Nonmanufacturing Industries. Nebraska is participating in a nation-wide Occupational Employment Statistics (OES) survey program designed to produce state and regional data on present and future employment for use in planning education and training programs. Occupational Employment Statistics from this survey will also be used to design career information materials. This type of survey provides a consistent approach for gathering employment data among the cooperating State Employment Security Agencies and the U.S. Bureau of Labor Statistics to develop current estimates and projections of national occupational requirements.

Evidence of the value of Occupational Information is demonstrated by the requests for Occupational Information received from employers, business consultants, developers and planners. They tell us that business firms who depend on the interest, skills and talents of their workers have a great need for Occupational Information. It provides some firms with indicators of potential types of jobs available in their industries and area labor markets.

The Occupational Employment Survey is done only once e very three years for an industry. This year (1987) the nonmanufacturing industries will be surveyed. The next year (1988) the balance of nonmanufacturing industries. The third year (1989) will cover the manufacturing industries and hospitals.

Due to the size of the industry, nonmanufacturing industries survey participants were selected on a random sample basis.

ATTENTION!! you may have already been chosen as a survey participant. If you have, please help Labor Market Information provide you and others with the most detailed and accurate information available. You can do this by promptly completing the survey form and returning it to Labor Market Information as soon as possible.

Wendell O. Olson • Labor Market Information Administrator

Information, The Cutting Edge In Competition

The Nebraska Department of Labor, through the Labor Market Information (LMI) division, in cooperation with the U.S. Bureau of Labor Statistics (BLS) and the Employment and Training Administration, is conducting a voluntary survey of Nebraska Nonmanufacturing Industries. Nebraska is participating in a nation-wide Occupational Employment Statistics (OES) survey program designed to produce state and regional data on present and future employment for use in planning education and training programs. Occupational Employment Statistics from this survey will also be used to design career information materials. This type of survey provides a consistent approach for gathering employment data among the cooperating State Employment Security Agencies and the U.S. Bureau of Labor Statistics to develop current estimates and projections of national occupational requirements.

Evidence of the value of Occupational Information is demonstrated by the requests for Occupational Information received from employers, business consultants, developers and planners. They tell us that business firms who depend on the interest, skills and talents of their workers have a great need for Occupational Information. It provides some firms with indicators of potential types of jobs available in their industries and area labor markets.

The Occupational Employment Survey is done only once every three years for an industry. This year (1987) the nonmanufacturing industries will be surveyed. The next year (1988) the balance of nonmanufacturing industries. The third year (1989) will cover the manufacturing industries and hospitals.

Due to the size of the industry, nonmanufacturing industries survey participants were selected on a random sample basis.

ATTENTION!! you may have already been chosen as a survey participant. If you have, please help Labor Market Information provide you and others with the most detailed and accurate information available. You can do this by promptly completing the survey form and returning it to Labor Market Information as soon as possible.

1/ Source of Data: ESARS (Employment Security Automated Reporting System). Includes those applicants registered for work in Nebraska Job Service Offices, and whose applications remained active as of December 31, 1986. These totals do not include all persons in Nebraska seeking jobs as of December 31, 1986. Also, one-digit occupational group totals include applicants assigned an entry code (lacking experience and/or training needed for a complete occupational classification). In the case of occupational group totals for clerical and sales, service, and miscellaneous, the entry codes are included in the total but cannot be assigned to the selected two-digit occupational subgroups shown, and consequently those subgroup totals will not add to the occupational group total.

2/ Total includes those not assigned an occupational code.

3/ Includes Black (not Hispanic), Hispanic, and other races. "Other races", include American Indian or Alaskan Native, Asian or Pacific Islander, and others.

4/ Includes mining, logging, utilities, miscellaneous amusement and recreation, graphic art work.

Information, The Cutting Edge In Competition

The Nebraska Department of Labor, through the Labor Market Information (LMI) division, in cooperation with the U.S. Bureau of Labor Statistics (BLS) and the Employment and Training Administration, is conducting a voluntary survey of Nebraska Nonmanufacturing Industries. Nebraska is participating in a nation-wide Occupational Employment Statistics (OES) survey program designed to produce state and regional data on present and future employment for use in planning education and training programs. Occupational Employment Statistics from this survey will also be used to design career information materials. This type of survey provides a consistent approach for gathering employment data among the cooperating State Employment Security Agencies and the U.S. Bureau of Labor Statistics to develop current estimates and projections of national occupational requirements.

Evidence of the value of Occupational Information is demonstrated by the requests for Occupational Information received from employers, business consultants, developers and planners. They tell us that business firms who depend on the interest, skills and talents of their workers have a great need for Occupational Information. It provides some firms with indicators of potential types of jobs available in their industries and area labor markets.

The Occupational Employment Survey is done only once e very three years for an industry. This year (1987) the nonmanufacturing industries will be surveyed. The next year (1988) the balance of nonmanufacturing industries. The third year (1989) will cover the manufacturing industries and hospitals.

Due to the size of the industry, nonmanufacturing industries survey participants were selected on a random sample basis.

ATTENTION!! you may have already been chosen as a survey participant. If you have, please help Labor Market Information provide you and others with the most detailed and accurate information available. You can do this by promptly completing the survey form and returning it to Labor Market Information as soon as possible.

Wendell O. Olson • Labor Market Information Administrator

Information, The Cutting Edge In Competition

The Nebraska Department of Labor, through the Labor Market Information (LMI) division, in cooperation with the U.S. Bureau of Labor Statistics (BLS) and the Employment and Training Administration, is conducting a voluntary survey of Nebraska Nonmanufacturing Industries. Nebraska is participating in a nation-wide Occupational Employment Statistics (OES) survey program designed to produce state and regional data on present and future employment for use in planning education and training programs. Occupational Employment Statistics from this survey will also be used to design career information materials. This type of survey provides a consistent approach for gathering employment data among the cooperating State Employment Security Agencies and the U.S. Bureau of Labor Statistics to develop current estimates and projections of national occupational requirements.

Evidence of the value of Occupational Information is demonstrated by the requests for Occupational Information received from employers, business consultants, developers and planners. They tell us that business firms who depend on the interest, skills and talents of their workers have a great need for Occupational Information. It provides some firms with indicators of potential types of jobs available in their industries and area labor markets.

The Occupational Employment Survey is done only once every three years for an industry. This year (1987) the nonmanufacturing industries will be surveyed. The next year (1988) the balance of nonmanufacturing industries. The third year (1989) will cover the manufacturing industries and hospitals.

Due to the size of the industry, nonmanufacturing industries survey participants were selected on a random sample basis.

ATTENTION!! you may have already been chosen as a survey participant. If you have, please help Labor Market Information provide you and others with the most detailed and accurate information available. You can do this by promptly completing the survey form and returning it to Labor Market Information as soon as possible.
